Summary

Computer Science graduate (CHI, 2026) with a strong foundation in Python, C++, Java, object-oriented programming, data structures, and problem solving, seeking a Junior Machine Learning Engineer role. Experienced in developing machine learning projects, including a spam detection model and an image generation model, with hands-on exposure to real-world AI applications. Skilled in front-end technologies such as HTML and CSS, with the ability to build and integrate technical solutions effectively. Recognized for rapidly learning new technologies and applying technical skills in practical environments through training and internships.

Technical Skills

- **Programming Languages:** Python, C++, Java
- **Web Development:** HTML, CSS
- **Machine Learning & Data Analysis:** NumPy, Pandas, Machine Learning Fundamentals
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures, Problem Solving
- **Mathematics:** Linear Algebra, Probability, Statistics
- **Other Skills:** IT Support, Troubleshooting, Fast Learning, Teamwork

Experience

Machine Learning Engineer (Graduate Projects) 2024 – 2026

- Developed and trained a spam detection model using machine learning techniques for text classification
- Built an image generation model and explored AI concepts related to computer vision and deep learning
- Performed data preprocessing, analysis, and model evaluation using Python, NumPy, and Pandas
- Applied problem-solving and analytical skills to improve model performance and accuracy
- Gained hands-on experience in developing AI solutions through self-driven projects and continuous learning

Projects

Spam Detection Model 2025

- Developed a machine learning model for spam message classification using Python
- Performed data preprocessing and text cleaning to improve model accuracy
- Applied machine learning techniques for detecting spam and non-spam messages
- Evaluated model performance and improved prediction results through testing and optimization

Education

Bachelor's Degree in Computer Science 2022 – 2026

(CHI)

Certifications & Training

- Machine Learning (In Progress)
- Programming Fundamentals – Route Oct 2024
- AI Training – JUST TO LEARN (Dr. Ahmed Morsi) Aug 2025
